Welcome back to the Temple

TO HER WE BOW

THE WHY

Initiations into the Sacral Wisdom

Congratulations: You have made it here for a divine purpose. Thank you for the Trust and unwavering devotion to your evolutionary development in this moment on Planet Earth. Thank you for the humble curiosity, strength & virtue to enter into a study of the Great Mystery, and for the wisdom, guidance and healing that has imparted you to bring you to this place. Thanking each of your guides & mirrors along this path to bring you to the Temple doorstep.

What is the Divine Mission of the Temple?

We are devoted to cultivating the Temple Space & Living Curricula for healing, transmutation & awakening of the Sacral chakra for Planet Earth.

We do this through our devotional Service to

- To support the Release & Re-Coding of the layers sexual repression & feeling the layers of Guilt and shame for my sexual and sensual nature, the re-coding of our Sexual life force energy as the primary life force that is our divine Birthright — and especially for the feminine to be given permission to Be Holy expressed in their sexual expression is the Orienting North Star of this work. To recognize and give space for the wild wisdom, the unconscious waters, the divine Ecstasy of conscious incarnation in a safe & sacred container.

- To reclaim & empower the potency of Daikini Collaboration & ancient secrets of harmonious the Dark

Red Lotus

Goddess in history from ancient times in Greece, to Babylonia — healing the deep shadow feminine (separation, competition & psychic warfare that the feminine has re-enforced both due to survival in the patriarchal system) and transmuting the fear that lives within our cells inherited from our ancestors, memory of prosecution of the Goddess.

- In the age of glorification of Doing & the illusion of “Progress” in linear time, this is a reclamation of the Empty space, the Void of Being, the Stillpoint, the Rest and the Receptivity & Devotion that comes from a state of humility, deep cultivation of self-awareness, contemplation, and rejuvenation.

- To remember our Birthright as Masters at our own feet, the Empowering capacity for us to heal deep intergenerational traumas and purify the karma within this lifetime, and reach Buddhahood within a single lifetime.

- To Reclaim & Protect the water ways & wisdom in this lifetime. The divine feminine re-Coding & re-imprinting the cells. To return to the Simple elemental forms of healing that is the basis of life on Earth, and the most potent under-valued source of healing on the planet — in combination with the Sun and the tantric relationship between the two.

We pray that the Red Lotus temple can be a place for you to find refuge in the deeper Truths and knowing of the Divine through the Master within your sacral & each cell within your body, remembering your inner nobility & dignity.

Bowing in gratitude for the forces that bring us together, guiding each other Home, once again. May the merits of this work ripple out across the Grid, overflowing into the Hearts of all sentient beings.

*In Devotion,
The Red Lotus Temple*

TIMELINE

THE BIGGER VISION

Alchemical Water Temple

TEMPLE DESIGN OF THE FUTURE

We are channeling the designs for the new Alchemical temples that embody the art & science of Tantric frequencies, optimized for harmony, beauty and kundalini awakening. Imagine.....

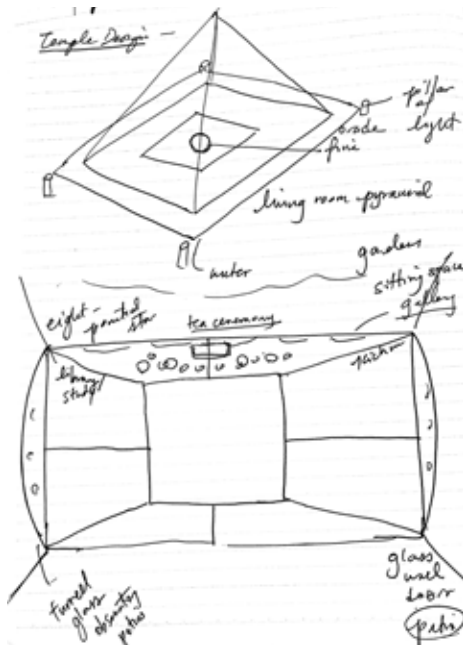

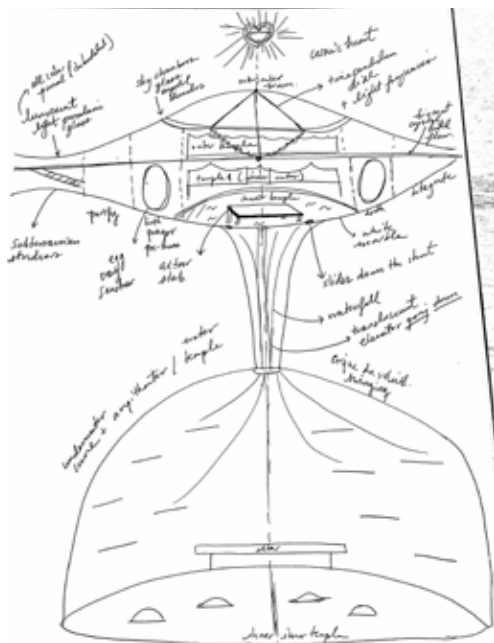

Crystalline cavernous water temples for energetic re-tuning.

Sound chambers bathing in frequency, color and light.

Egyptian biogeometry architecture for highest harmonic frequencies.

Blueprint layouts designed for ritual practice, council, individual and group initiation and sacred solitude.

Sacred nourishment, divine wardrobe and ritual tools designed with pure presence.

Ting 'Anahitha' Kelly

Bio & Context

FOUNDER, ORACLE

Ting Kelly is an experience designer, writer and network weaver who walks the path between Silicon Valley and the East, the ancient world of temple arts and the new Jedi leadership schools. Growing up in hotpot of Wired magazine and roaming the Playa of Burning Man starting at the age of 6, to traveling the world with her anthro-futurist family photographing indigenous craft and ceremony in the likes of Bali and Tibet -- imprinted her cellular memory of the ancient, while her bi-lingual international private education in Silicon Valley gave her the rigor and discipline to ground big ideas into the present future.

After a 10-year career as an innovation consultant, experience designer and ecosystem researcher, starting with her first company when she was 10, to consulting city governments, foundations and family offices, Fortune 100 executives, and startup founders -- she received a series of near-death experiences and health crises which were mystical awakenings in disguise that shifted her devotion towards ancient wisdom lineages, ritual studies and quantum consciousness. From this devotion, she founded Ritual Collective to weave wisdom practitioners with the conscious leaders to create the foundation for a new paradigm of school system devoted to the Sacred for all stages of life. They have hosted immersive retreats, gatherings and workshops around the world, designed several online courses, and partnered with countless practitioners to translate their teachings for the modern medium.

She believes that the future of our intragalactic human evolution will be birthed out of a new trans-lineage Dharma rooted in the feminine Mysteries and Tantra lineages— catalyzing the birth of the Red Lotus to be a sacred temple of practice, initiation and communion based in Italy. An avid world traveler, her roots permeate deep on the coast of California, where she lives in a temple devoted to ritual practice of integral studies, calligraphy and cacao. She continues to serve on several advisory boards doing real good work in the world: Long Now Foundation, UN DP Innovation Accelerator, TACT Agora, Water Innovation Fund and School for Traditions.
